

## Data collection for the 2019 CAQH Index has begun!

The [CAQH Index Report](#) is the industry source for tracking and benchmarking dental plan and provider adoption of fully electronic administrative transactions. It estimates industry cost savings opportunity, an amount that declines as adoption and efficiency grows.

The success of the index is dependent upon participation from medical and dental health plans and providers. By participating as a data contributor, organizations at every stage of adoption can help improve the overall quality of data, enabling deeper industry insight into the transition from manual to electronic administrative transactions. Data contributors also receive a **customized benchmark report** comparing their organization's performance to national results for adoption and cost savings opportunities.

To access the DENTAL PROVIDER survey, please click [here](#). A printable PDF version of the [dental](#) PROVIDER survey is also available to share with others.

To access the DENTAL PLAN survey, please click [here](#). A printable PDF version of the DENTAL PLAN survey to share with others is also [available](#).
